Hi Greg,

Yes, a Task order and funding is already in place to do this. I planned for non-Libby data issues this year, so the contractor is funded and ready to go.

Subject: Pavillion Scribe data for Phases III and IV

Dave, I have SCRIBE up on my computer and have detected some issues with the data reported. I think I need to work with the folks (contractors) who have the original input files so that I can correct/adjust how the data is being loaded into SCRIBE. I really want this data base to be reliable but we are going to have to spend addition funds and effort to get it right which may mean re-loading the data for phases III and IV.

Here's the big question..... do we have contract funding available to do this? I'd like to get this cleared up so that when we load in Phase V it is a much easier task.
